Leonard McCreedy
U.S. Patent Office
PO Box 1450
Alexandria, Virginia 22313-1450

Reference: Application Number-10/799985, Confirmation No. 8789

Named applicant- James Davis, JR.
1630 West Cherry Street
Chanute, Kansas, 66720
620-432-0068

Dear Leonard,

I am writing to inform you that I do not want my application abandoned and I am formally appealing the decision that came from your office.

I am not an attorney, nor is Tom who wrote our application. We are in small town Southeast Kansas. We have been honest and responsive to all documents sent to us for corrections. We have paid all fees and have documents that no more cost have come to our acknowledgement. If we owed something, we would have paid it and kept working on what you needed.

I must stress to you that our invention will save lives and property destruction and it will extent fuel usage from 15% to 25% using less fuel. The product sincerely makes the industry take charge of a overlook need.

I am upset that I have not been informed by call or letter document of any fees or costs to me. I never know when according to US Patent office will call from what office and not know who I am even talking to. There is no law known by me that states that I have to have, hire, whatever a patent attorney. This is what I am told often, yet, I have met all requirements and followed all rules and regulations.

I understand that after receiving our Patent Pending certificate, I have talked to many rude and not understanding employees. And I have had many negative calls of not getting to talk to anyone. I know that I have not received adequate communication-verbal nor documentation, any list of objectives and references on a timely schedule and often nervous to talk to any one.

I am not giving up with the money, time, testing, improving safety margins, etc. to have this patent application lost. I am a small town small businessman who made this invention because of the trailer frame industry. I deal with people that are traveling through our community having problems and have no idea way their trailer has to be crooked going down the road and why they have to really drive their tow vehicle.

I would greatly appreciate that you will accept this letter document and as soon as possible inform me what my rights are and what are the choices to move this patent closer to being accepted.

Thank you for your cooperation and understanding. I feel that the American citizen veteran has the privilege of obtaining and using the offices of the federal govt. at his need. I am not big money trying to flood the market, but trying for a shot at something in life.

Respectively

James Davis JR

p.s. I have requested help from my sentators and representative.
